

## Customizable Flexible Design

Our flexible cabinet design allows you to embed your Tickers into walls, stream them up pillars, wrap around corners, or bend them into concave, convex, serpentine, or other elegant configurations to best fit your architectural design.

Displays start at 6 foot in length and are expandable in 1 foot increments to any length.

## Web-based Software

The plug-and-play design of the Rise Ticker means you don't have to supply a computer - the "smarts" are built in. Just plug it into any Ethernet port with Internet access and information starts flowing.

To schedule and update your messages simply log in from any accessible computer using your secure username and password.

## Full Color & Graphical

Enjoy the power of a full color pallet (24 bit, 16.7 million color shades) to ensure each message or graphic you create has maximum visual impact.

As part of our software and content package you get access to our extensive logo database including all professional sports teams, Division I NCAA colleges, and the S&P 100 constituents.
