- 09 / About Us

STYLES

Straight

Stock tickers can be built to any length. We start at 4 foot and can expand in as little as 7.5 inch increments to as long as you need. While the average stock ticker is around 30 feet in length, we have built displays several hundred feet long for financial environments.

Flexible Curved

Don't assume your stock ticker has to be mounted on a flat surface. We can bend your stock ticker to fit almost any surface, serpentine, concave, or convex. The cabinet is flexible and designed to form your shape on-site, no custom engineering required.

Circular

We can wrap circular, oval, and elliptical surfaces as tight as a 3-foot radius. The circular designs can be on the inside or outside of the circle attached to an existing structure or suspended from the ceiling.

STYLES

Wrap Corners

Don't let the length of your wall dictate the length of your ticker. Our displays are designed to take corners in stride. Inside corners, outside corners, custom angles, wrap the entire trading room, it doesn't matter. A ticker can turn more than corners...it can turn heads.

Vertical

When you rotate a LED ticker to travel vertically, it helps draw attention by dressing up structural columns or helping to tie multiple floors together. The data can be news, stock quotes, or any other messages you can dream up.

Outdoor

Need something on the exterior of your building to attract attention and let people know you are serious about finance? We have outdoor rated models in a range of different heights to communicate with people passing by.

SPECIFICATIONS

32 Pixel (6")

- Cabinet Height: 5.8 in.
- Cabinet Width: Starts at 48 in.
- Cabinet Depth: 1.9 in. (with wall mount 4 to 7.5 in.)
- Pixel Pitch: .16 in. (4mm)
- Weight: 2 pounds per ft.
- Max Power: 12.8 watts per ft. (1 outlet every 110 ft.)

48 Pixel (8")

- Cabinet Height: 8.3 in.
- Cabinet Width: Starts at 48 in.
- Cabinet Depth: 1.9 in. (with wall mount 4 to 7.5 in.)
- Pixel Pitch: .16 in. (4mm)
- Weight: 3 pounds per ft.
- Max Power: 19.2 watts per ft. (1 outlet every 74 ft.)

64 Pixel (11")

- Cabinet Height: 10.9 in.
- Cabinet Width: Starts at 48 in.
- Cabinet Depth: 1.9 in. (with wall mount 4 to 7.5 in.)
- Pixel Pitch: .16 in. (4mm)
- Weight: 4.2 pounds per ft.
- Max Power: 25.6 watts per ft. (1 outlet every 56 ft.)

APPLICATIONS

Retail Banks / Brokerage

Most retail branches struggle to attract new customers. We provide retail tickers & displays for stores and retail environments that add excitement and energy to your lobby or venue area creating an inviting space that clearly shows your financial credibility.

Finance Labs / Trading Rooms

The best way to increase enrollment is by providing a state-of-the-art learning facility that prepares your students for the action of Wall Street. Leading finance labs utilize LED stock tickers to show the global markets at a glance. A LED ticker will wow your visitors and parents while attracting potential donors.

Lobbies

So you have the opportunity to create a new space and the last thing you want it to be is boring. Whether you are building a new facility or simply renovating your current space, there's no better way to modernize it than by incorporating a ticker display.

RISE TICKER APP

Ticker Management

- At a glance see if your display is online/offline
- Set power save schedule (on/off)
- Control scroll speed
- Set ideal brightness level
- Invite other users to contribute
- Schedule playlist items by date and/or time

Content Options

- User entered messages
- Simple images/graphics

- Financial quotes
- Sports scores
- Integration with Google Sheets

Subscription Cost

- Ticker App for messaging \$20/mo.
- Ticker App with Sports or Finance \$40/mo.
- Ticker App with Sports & Finance \$50/mo.
- 10% discount for 3 year prepay
- 20% discount for 5 year prepay
- Perpetual licenses available

WHY RISE?

Our decades of experience installing ticker displays ensure it is easy for our customers to get exactly what they want. You can always find a cheap LED product, but we have integrated quality hardware and content to get rid of the headaches and confusion.

So why should you buy a quality product from Rise Display?

1. **A complete solution** – We are a one stop shop for not only the hardware and software but also the data feeds, installation, and all of the ongoing support. Why does this matter to you? It means if you have questions or anything goes wrong the buck stops with us.
2. **Quality** – We are so confident in the quality of our solution, we back it up with a full 5 year on-site warranty to provide you complete peace of mind.
3. **Engaging content** – We make it easy to insert your messages along with licensed data compliant with the exchanges and providers. This means your content is legally obtained and curated by our newsroom that monitors the integrity of the information.

ABOUT RISE DISPLAY

Rise Display was created in 1992 in a joint venture with Reuters to create a software tool for displaying real-time financial information on LED wallboards. In 2001 Rise evolved from a software provider to offering a complete solution consisting of the hardware, software, and data feeds to financial and education clients. In 2008 Rise improved the tri color (red, green, yellow) ticker technology to full color (65,000+ shades) and made it fully graphical to show quality logos.

We have been passionate about live data and how to display it on LED signs for several decades. That's why every decision we've made has been geared toward reliability.

We have helped thousands of clients just like you establish credibility with live sports score tickers and stock quotes to motivate students, visitors, and customers. Over the last 10 years we've installed nearly 100,000 feet of ticker displays across North America.

In May of 2021 we were acquired by Skybox Sports Network enabling us to bring new content and display packages to ticker customers everywhere.
